### **THEORY OF THE CASE**

17. This Complaint and case presentation arises from a collection of facts, observations, expert opinions, media reports and eye witness testimony that seeks to demonstrate that: Defendants planned and executed on the intentional release of a bio warfare toxin; (sometimes referred herein as either “SARS-COV-2” or “Covid 19” and/or specifically as the spike protein component) to cause panic, economic hardship, terror, death and injury to global populations through psychological warfare mechanisms; including but not limited to media reports, public policy, coercion, travel restrictions, employment restrictions and liberty restrictions; for the purpose of tricking, coercing or mandating the global population into receiving a pre-planned experimental gene therapy shot (“Covid 19 Vaccines”); in order to cause mass casualties, sickness, death, computer tracking, programming and control

over the survivors of this genocide; in furtherance of Defendants' goals to control humanity for their own personal, economic, academic and political benefit.

## FACTUAL ALLEGATIONS

18. The sequence of dates and times may not follow a linear path in the presentation of the FACTS as stated hereafter, because events contributing to the crimes enumerated herein are vast, international and occurred over the course of many years and involve numerous defendants, criminal actors, conspirators and collaborators.
19. On or about March 1, 2013 persons including, but not limited to: Dr. Anthony Fauci, Eli Broad, Theodore Turner, Warren Buffet, Oprah Winfrey, George Soros, William Gates Jr., and other Defendants met in New York for the purpose of planning mass reduction of the World's population, See **Exhibit 1**.
20. Between January 2014 and December 2020, Defendant Fauci, along with other named and unnamed Defendants through their instrumentalities, including but not limited to the National Institutes of Health, EcoHealth Alliance and the Department of Health and Human Services, provided samples of bio warfare agents and funding to the Wuhan level 4 biolab for the purpose of obtaining "gain of function" of said samples to weaponize the samples into a manufactured toxic virus to be released intentionally to cause a global epidemic or pandemic as described and defined in *The Fifty-eighth World Health Assembly REVISION OF THE INTERNATIONAL HEALTH REGULATIONS (2005)* page 11 attached and annexed as a part of this Criminal Complaint as **Exhibit 2**. See also <https://www.thesun.co.uk/news/15069561/fauci-admits-us-sent-600k-wuhan-lab-covid/> &
21. In or about May 2010, the Rockefeller Foundation and Global Business Network published *Scenarios for the Future of Technology and International Development*, which outlines a scenario whereby World powers utilize a global pandemic, naturally occurring or man-made, that presents an opportunity to technocratically control humanity and reduce the size of the global population. See: **LOCK STEP Scenario, Narratives, A world of tighter top-down government control and more authoritarian leadership, with limited innovation and growing citizen pushback (page 18)**. Said publication provided the framework and methodology for the planning and preparation for a planned bio warfare attack on the global population in furtherance of the planned Genocide occurring now and affecting every person in every country and location on the planet; thus proving motive or the *mens rea* element of the crimes alleged herein. Attached and annexed as **Exhibit 3** ([https://www.centerforhealthsecurity.org/news/center-news/2017/2017-10-23\\_spars-scenario.html](https://www.centerforhealthsecurity.org/news/center-news/2017/2017-10-23_spars-scenario.html))

22. On or about October 2019, Defendants Gates, Fauci, Brix, the NIH, CDC and WHO, together with associated conspirators planned, orchestrated and conducted Event 201 whereby they practiced their global and industry-wide response to their criminal enterprise. See Event 201 attached and annexed as **Exhibit 4**.
23. On or about September 2015, Defendants Richard A. Rothschild & the Pirbright Institute developed and patented the “Covid 19” Polymerase Chain Reaction (“PCR”) test kit, four and a half years before the discovery of the Novel Corona Virus SARS 2, later renamed “Covid 19” in March of 2020. See **Exhibit 5** & <https://foreignaffairsintelligencecouncil.files.wordpress.com/2021/02/rothschilds-patented-covid-19-biometric-tests-in-2015.-and-2017.pdf> & <http://stateofthenation.co/?p=7130>
24. In 2015, Defendant Gates stated, “that an infectious disease pandemic posed a greater threat to the world than nuclear war;” and “If anything kills over 10 million people over the next few decades, it’s most likely to be a highly infectious virus rather than a war — not missiles, but microbes,” See: <https://www.rev.com/blog/transcripts/bill-gates-ted-talk-transcript-from-2015-warns-of-pandemics-epidemics> & <https://pubchem.ncbi.nlm.nih.gov/patent/US-7776521-B1#section=Inventor>
25. On or about November 9, 2015 Defendant Baric published A SARS-like Cluster of Circulating Bat Coronaviruses Shows Potential for Human Emergence, which was the result of his research to create such a virulent disease with manufactured “gain of function” in order to increasing transmissibility. Said report was directed to and sent to Defendant Fauci and states in part, “Having established that the SHC014 spike has the ability to mediate infection of human cells and cause disease in mice, we next synthesized a full-length SHC014-CoV infectious clone based on the approach used for SARS-CoV (Fig. 3a)<sup>2</sup>. See: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4797993/>
26. On or about November 9, 2015, in the same scientific paper titled A SARS-like Cluster of Circulating Bat Coronaviruses Shows Potential for Human Emergence, Defendant Baric states, “to examine the emergence potential (that is, the potential to infect humans) of circulating bat CoVs, **we built a chimeric virus** encoding a novel, zoonotic CoV spike protein . . . Using this approach, we characterized CoV infection mediated by the SHC014 spike protein in primary human airway cells and *in vivo*” and concludes “these results confirm that the DIV vaccine would not be protective against infection with SHC014 and **could possibly augment disease in the aged vaccinated group**.” [Emphasis added]. See: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC4797993/>
27. On or about February 17, 2017, Defendant Gates predicted a world-wide pandemic at the 53 Munich Security Conference stating, “Bioterrorism has become feasible

enough that a genetic engineer could use computers to create a synthetic airborne pathogen capable of wiping out a fraction of the world's population quickly." The next epidemic could originate on the computer screen of a terrorist intent on using genetic engineering to create a synthetic version of the smallpox virus," "or a super contagious and deadly strain of the flu. [emphasis added]" See:

28. On or about January 17, 2017, Defendant Fauci met with and warned the newly elected President Trump, "There is no question that there will be a challenge to the coming administration in the arena of infectious diseases," further stating, "The thing we're extraordinarily confident about is that we are going to see this in the next few years." See: [https://www.huffpost.com/entry/fauci-warned-of-trump-pandemic-2017\\_n\\_5e8a0548c5b6e7d76c65c8a4](https://www.huffpost.com/entry/fauci-warned-of-trump-pandemic-2017_n_5e8a0548c5b6e7d76c65c8a4)

29. In or about January 2018, the World Bank together with its affiliated financing subsidiaries and associated entities, including the International Monetary Fund ("IMF"), financed the purchase of Covid 19 Polymerase Chain Reaction ("PCR") Test kits for more than 50 countries world-wide. Said kits were specifically for the purpose of diagnosing Covid 19, which was a disease that did not exist in 2018 and the Novel Corona Virus SARS 2 was not named as "Covid 19" until March of 2020; yet the World Bank not only financed the acquisitions of the tests, but referenced them as being used to detect "Covid 19", a heretofore undefined disease. See **Exhibit 6**.

30. On or about March 23, 2019, Defendant WHO declared and published its first "Situation Report" thereby triggering the claim against a \$500,000,000 Pandemic Insurance Financing Bond issued by Defendant World Bank for the purpose of ratifying the pandemic declaration and payment of funds to other named and unnamed Defendants, including payments made or recovered pursuant to Covid 19 PCR test kits patented and previously sold or financed in 2015 and 2018 respectively; one to five years prior to the renaming of SARS-COV-2's official designation as Covid 19. See **Exhibits 5 & 6**. See also <https://www.who.int/emergencies/diseases/novel-coronavirus-2019/donate>

31. On or about October 18, 2019, associates of the named and unnamed Defendants caused the release of the manufactured SARS-COV-2 Coronavirus in Wuhan, China at the **7th CISM Military World Games**, intentionally or with such wanton disregard for human life that homicidal intent is inferred with knowledge and malice aforethought of the implications and ramifications on global health and world populations through the enhanced transmissibility and virulent, harmful, deadly and contagious features of the bioweapon later named officially by Defendants as the "Covid 19 Virus." See: <https://www.news.com.au/world/coronavirus/leaked-chinese-document-reveals-a-sinister-plan-to-unleash-coronaviruses/news-story/53674e8108ad5a655e07e990daa85465>

32. In or about January 2020, named and unnamed Defendants together with their conspirators and collaborators caused the Covid 19 Virus to be transmitted into the United States with knowledge and malice aforethought for the purpose of creating and declaring a Global Pandemic as defined by the World Health Organization pursuant to the International Health Regulations 2005 as amended and pursuant to the provisions of Global Preparedness Report of 2019. See **Exhibit 2** and <https://www.foxnews.com/media/chinese-virologist-government-intentionally-coronavirus>
33. On or about March 11, 2020, Defendants Fauci and NIH were made aware of the fabricated nature of the Covid 19 Virus when Adam Gaertner sent an email containing the exact manufacturing process by which the Covid 19 was created, including components designed to impair or obstruct normal immunological response. The mechanism by which the Virus was created (“cookbook”) was available to Defendants Fauci and NIH for investigation and analysis at the very beginning of the intentional outbreak in the United States; yet Defendants along with their co-conspirators maintained the narrative that the Virus was naturally occurring until June of 2021. It was Defendants Fauci, NIH, Baric, Collins, Daszak and others that funded, collaborated and disguised the Virus in an effort to ensure their stated goals and warning to President Trump; “The thing we’re extraordinarily confident about is that we are going to see this in the next few years.” See **Exhibit 7** & [https://www.huffpost.com/entry/fauci-warned-of-trump-pandemic-2017\\_n\\_5e8a0548c5b6e7d76c65c8a4](https://www.huffpost.com/entry/fauci-warned-of-trump-pandemic-2017_n_5e8a0548c5b6e7d76c65c8a4)
34. On or about December 24, 2020, Defendants WHO, CDC, NIH, among others, fraudulently and intentionally caused governments, ministries, hospitals and global health services to mandate the use of ineffective face masks and utilize and incorporate the use of knowingly ineffective PCR tests among the global population for the purpose of inciting fear, terror and coercion among the complainants. In fact, the inventor of the PCR test stated, “Anyone can test positive for practically anything with a PCR test, if you run it long enough.” See: <https://stephenlendman.org/2021/04/pcr-tests-dont-work-and-risk-harm/> & <https://www.cdc.gov/media/releases/2020/s1224-CDC-to-require-negative-test.html>
35. In and around the dates of September 2020 to May, 2021, named and unnamed Defendants, including but not limited to the CDC, WHO, NIH, fraudulently coerced, mandated, tricked and conducted a criminal scheme to increase the fear and terror among the global population by economically rewarding hospitals, physicians, governments, ministries and health service providers with pecuniary rewards up to US \$400,000 per case for diagnosing substantially all sickness, morbidity and fatalities as being caused by Covid 19. See <https://www.cdc.gov/coronavirus/2019-ncov/travelers/testing-international-air->

[travelers.html](#) & <https://www.ahcancal.org/Survey-Regulatory-Legal/Emergency-Preparedness/Documents/COVID19/Testing-Requirements-FAQs.pdf>

36. On or about August 22, 2005, Defendant Fauci and Defendant NIH declared Hydroxychloroquine a ‘wonder drug’ for the treatment of SARS-COV-1 and MERS, stating in The Virology Journal (Defendant NIH’s publication) that “Chloroquine is a potent inhibitor of SARS Coronavirus spread.” Yet, on or about July 30, 2020, Defendant Fauci testified to Congress that Hydroxychloroquine has “**no therapeutic effect**” on Covid 19. See: <https://news.yahoo.com/fauci-shoots-down-flawed-hydroxychloroquine-183931215.html>
37. On or about January 20 2021, Defendants Fauci and NIH publicly dismissed and subverted the use of Ivermectin, a known and generic antiviral medication that clinically demonstrated a significant reduction in Covid 19 viruses within a 48 hour period. Congressional testimony by Dr. Pierre Kory in December 2020 reported a substantial success rate using Ivermectin as both a prophylactic and cure after conducting a review of dozens of peer reviewed trials, studies and publications. See <https://www.bitchute.com/video/YnSppbsgDBYS/> & <https://www.medsearchuk.com/controversy-flares-over-ivermectin-for-covid-19-controversy-flares-over-ivermectin-for-covid-19/> & <https://www.thegatewaypundit.com/2021/06/smoking-gun-fauci-lied-millions-died-fauci-informed-hydroxychloroquine-worked-lied-public-instead-despite-science-fauciemails/>
38. On or about January 31, 2020, Defendants Fauci, Collins, Farrar and Daszak conspired to and did conduct a fraudulent clinical trial, in response to positive reports about the benefits of HCQ, wherein they overdosed patients with Hydroxychloroquine for the purpose of creating a published report discounting the drug’s efficacy and labeling it dangerous and deadly; said conspiratorial conduct, including the publishing of the fraudulent results in several scientific journals, including *The Lancet* and *Nature*, is now published in their own notes, emails and documents pursuant to a Freedom of Information Act request by and published by *Buzzfeed*. See: <https://childrenshealthdefense.org/defender/fauci-emails-top-public-health-officials-lies-covid-origin-treatments/> & <https://www.msn.com/en-us/health/medical/fda-denies-henry-ford-s-request-for-hydroxychloroquine-approval/ar-BB17VGtg>
39. Furthermore, Dr. Peter McCullough, who opines frequently as an expert on the use of antiviral medications for the treatment of Covid 19 infections and prevention, testified to on November 19, 2020 to the **Senate Homeland Security Committee Hearing on COVID-19 Outpatient Treatment**; wherein he describes in detail the success of the antiviral medications, clinical studies and treatment protocols that were saving lives at the time. Dr. McCullough also provided statistical data in his testimony to the US senate that 50% of

the American lives lost could have been saved with early treatment (4-6 drugs in combination). On March 10, 2021, Dr. McCullough testified in the Texas Senate that 85% of the lives lost could have been saved since “we had evolved better treatment programs.” The current estimate is 85% of lives lost could have been saved, according to Dr. McCullough. 40. Said testimony patently contradicted the subversive messaging and publications Defendants Fauci, Daszak, Collins and Farrar orchestrated with their co-conspirators. Effectively no policy change resulted even after a redaction by said publications (**Exhibit 7 Continued**) as it relates to the conduct of the Defendants aforementioned; and the FDA persisted in its banning of the emergency use of HCQ as a treatment alternative. See: <https://ratical.org/PandemicParallaxView/DrMcCulloughC19OutpatientTreatment.html> & <https://www.nejm.org/doi/full/10.1056/NEJMoa2012410>

#### **IN RELATION TO DEFENDANT VACCINE MANUFACTURERS, THEIR OFFICERS, DIRECTORS & CONSPIRATORS**

41. On or about October 2016, Defendant National Institutes of Health together with other interested parties filed for US Patent WO/2018/081318 to create an injectable compound to cause the recipient to produce prefusion coronavirus Spike proteins. This injectable is known as the “Moderna Covid 19 Vaccine” See **Exhibit 7**.
42. Said Moderna Covid 19 Vaccine contains SM-102 (also Luciferase), which is a known poison fatal to humans and animals as disclosed in Moderna’s Food and Drug Administration’s published ingredients list. See **Exhibit 8** (list of ingredients and toxicity report for SM-102).
43. Said Moderna Covid 19 Vaccine, per **Exhibit 7**, is designed to cause the human recipients to mass produce Corona Virus Spike Proteins through messenger RNA stimulus; such Spike Proteins are known to cause acute cardiovascular disease. Indeed See **Exhibit 9**.
44. Animal testing conducted with the Moderna Covid 19 mRNA Vaccine was undertaken in 2012, which included a “Challenge” study whereby inoculated animals were exposed to the SARS-Cov-2 virus (later called “Covid 19”) and in each and every instance, the test animals developed Pulmonary Immunopathology causing a 100% fatality rate. The conclusions of various scientific journals opine that the deaths of the test animals were not caused directly by the vaccine; rather they were caused by the test subject’s immune response of Spike Protein creation from the changes made to the animals’ immune system by virtue of the messenger RNA in the Vaccine. See **Exhibit 10** &

<https://variager.wordpress.com/2021/01/30/dr-lee-merritt-in-animal-studies-after-being-injected-with-mrna-technology-all-animals-died-upon-reinfection/> & <http://www.uphs.upenn.edu/cep/COVID/mRNA%20vaccine%20review%20final.pdf> & [https://www.lewrockwell.com/2021/04/no\\_author/dr-lee-merritt-in-animal-studies-after-being-injected-with-mrna-technology-all-animals-died-upon-reinfection/](https://www.lewrockwell.com/2021/04/no_author/dr-lee-merritt-in-animal-studies-after-being-injected-with-mrna-technology-all-animals-died-upon-reinfection/)

45. Thirteen (13) people died in the Moderna human clinical trials as a result of the said enhanced autoimmune response, which is beyond the industry standard threshold of continued development for marketable use. See **Exhibit 11**.
46. All of the Vaccines produced by the Defendant manufacturers (Johnson & Johnson, Moderna, Pfizer and Astra Zeneca) caused the same immunopathological response in their animal challenge tests conducted years in advance of the Emergency Use Authorization and all experienced up to a 100% fatality rate in their challenge studies. Furthermore, the science was so dispositive that on or about January 25, 2021, Pfizer's former Chief Science Officer (Dr. Michael Yeadon) warned "Governments are lying because they are going to kill you and your family." See **Exhibit 12**.
47. All of the Defendant manufacturers knew, or should have known, that their Vaccines caused this immunopathological response and were warned by the FDA against conducting human trials. See **Exhibit 13**.
48. As of May 28, 2021, the Vaccine Adverse Reaction Reporting System details in excess of 5,100 fatalities and more than 294,000 Serious Adverse Events ("SAE") and serious injuries resulting from all four mRNA vaccines produced by the Defendant Manufacturers. It is worth noting that the VAERS system only collects approximately 1% (and at most 10%) of the actual injury or fatality rates because the reporting format and process is so cumbersome that substantially all people negatively affected by any vaccine or those treating them, simply skip reporting into the system. This means that the real fatality rate is currently somewhere between 51,000 to 510,000. See **Exhibit 14** & <https://www.openvaers.com/covid-data#modal-anaphylaxis>
49. On or about April 20, 2012, the Federation of Registration Agencies (DOI) published a report that analyzed all of the mRNA vaccines at the time and arrived at the conclusion that each such injection presents a near certainty that all SARS Coronavirus vaccinations lead to Pulmonary Immunopathology upon challenge of the user; meaning that the inoculated person or animal will die when exposed to the virus or (relative thereto) being vaccinated against. This peer-reviewed, common conclusion of scientists responsible for registration of vaccines arrived at this conclusion more than 8 years in advance of the release, distribution and sale of the Covid Vaccines. See **Exhibit 15**.

50. At all material times Defendants Fauci, Birx, Gates, Tedros, Baric, Daszak and others were acting in their official capacities and had the authority to represent the interest of and contractually bind the institutions or entities by whom they were employed or compensated.
51. At all material times, Defendants Fauci, Rothschild, Gates, Baric, Daszak, NIH, CDC, WHO and other named and unnamed Defendants had economic interests in the intellectual property rights of the Covid 19 Virus or the various Covid 19 Vaccines or both and conspired to economically benefit from the exploitation of these bio weapons. See: <https://www.niaid.nih.gov/research/anthony-s-fauci-md> & <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC2866602/> & <https://fort-russ.com/2020/04/breaking-kennedy-exposes-dr-faucis-role-in-creating-highly-infectious-mutant-strain-of-coronavirus/>

### **Publicly Available Opinions of Medical Doctors and Scientists**

52. Medical Doctors and scientists in the biological health and treatment of human beings confirm:

- a) the fatality rate of the SARS-COV-2, also known as COVID-19, virus (hereinafter "Virus") is .0046% across combined age groups under age 70 in the United States; See: <https://www.cdc.gov/coronavirus/2019-ncov/index.html>
- b) the case fatality rate was purposefully inflated by Defendants World Health Organization, Centers for Disease Control and Prevention, The National Institutes of Health or any other governmental or non-governmental agency or entity acting with authority to make such a declaration; See: <https://www.cnsnews.com/article/washington/melanie-arter/cdc-director-i-think-youre-correct-about-inflated-covid-death>
- c) there are widely available and extremely effective therapeutic medicines, inclusive of hydroxychloroquine and ivermectin, that both prevent and treat said Virus; see: <https://pubmed.ncbi.nlm.nih.gov/32283237/>
- d) Defendants named herein caused people, entities, organizations and health care services to avoid the use, prescription and delivery of said therapeutic medicines to patients and the public at large and caused the therapeutic medicines to be unavailable to infected individuals and the public, resulting in large numbers of unnecessary injuries and deaths in those that were infected with the Virus; see: <https://noqreport.com/2021/05/31/dr-pierre-kory-exposed-whos-suppression-of-ivermectin-youtube-keeps-deleting-this-video/>
- e) credible evidence exists to support a conclusion that interested parties and stakeholders disregarded scientific data and alternative, efficient therapies to coerce people and entities to require COVID-19 injectables as a condition of employment,

entry to properties, purchase of goods and services and admission to gatherings;  
See: <https://stateofthenation.co/?p=64361>

f) the Defendant manufactures of the four “COVID-19 Vaccines” identified herein, have attempted and failed to create a messenger RNA styled vaccine that is suitable for sale or distribution due to safety concerns, fatalities and morbidities experienced during both animal and human trials despite more than 10 years of testing; See: <https://edition.cnn.com/2020/09/01/health/eua-coronavirus-vaccine-history/index.html>

g) the Defendants, manufacturers and other participants, were warned in multiple scientific and media papers that mRNA designed to increase spike protein production is and was hazardous to the users’ autoimmune systems; See: <https://principia-scientific.com/halt-covid-vaccine-prominent-scientist-tells-cdc/>

h) the mRNA and adenoviral injections all code for the original spike protein that was the product of Gain of Function (hereinafter “GOF”) research in Wuhan, China; See: <https://childrenshealthdefense.org/defender/covid-vaccine-spike-protein-travels-from-injection-site-organ-damage/>

i) this laboratory engineered spike protein component created in Wuhan, China is intentionally caused to be produced in humans via the subject COVID-19 injections. Furthermore, said spike protein was intentionally modified at the furin cleavage site of the protein, making the spike protein elicited to be produced in the body by the COVID-19 injections far more dangerous and infectious to the human body than the original spike protein created in Wuhan, China; See: <https://www.ncbi.nlm.nih.gov/pmc/articles/PMC7859469/>

j) the spike protein elicited to be produced by injection of the purported COVID-19 “vaccines” has intentionally placed sequences of RNA that code for known epitopes of the HIV virus (see: <https://www.thegatewaypundit.com/2021/06/caught-top-official-thanks-dr-fauci-email-april-2020-insisting-covid-19-naturally-occurring-men-knew-lie/>);

k) once administered to humans, all COVID-19 injections cause the human body to produce the modified Wuhan spike protein product of Gain of Function (“GOF”) research in an uncontrolled fashion for as long as two weeks with no regulation mechanism for 1) the concentration of spike protein, 2) the tissues or locations in the body where it is created, 3) its distribution in the body, and 4) the duration of its ability to be produced in the body; see: <https://www.pnas.org/content/117/41/25254>

l) this Wuhan spike protein product of GOF research directly causes damage to blood vessels and major organs, including the lungs, heart, brain, kidneys and liver and directly promotes the development of blood clots in critical organs resulting in permanent disability and death in some cases; See:

<https://drmalcolmkendrick.org/2021/06/03/covid19-the-spike-protein-and-blood-clotting/>

m) the United States mass vaccination program is investigational and Defendants, either knowingly or with a duty to know and with a reckless disregard for human life, committed egregious malfeasance that has resulted in harm to at least hundreds of thousands and death to at least many thousands of people, in failing to establish an external unbiased clinical event adjudication committee, data safety monitoring committee, or human ethics committee. As a result, there is no mechanism for risk mitigation in the investigational program (critical event committee, data safety monitoring board, human ethics committee) and this has contributed to causing the aforementioned injuries and deaths. Remarkably, 46% of the deaths that have occurred following the injections have taken place on days 1, 2 or 3 post injection; See: <https://www.wsj.com/articles/people-harmed-by-coronavirus-vaccines-will-have-little-recourse-11602432000>

n) furthermore, in an act of egregious malfeasance, Defendants recommended administration of the experimental injections in large patient groups that were excluded from the registrational trials on the basis of either anticipated lack of benefit or excessive harm, resulting in severe harm and/or death to at least many thousands of people in these groups that were administered the injections. These groups include: COVID-recovered, suspected COVID-recovered, those with positive serologies, pregnant women, and childbearing women who could not assure contraception. In fact, Defendants knowingly administered the COVID-19 injections to individuals with durable natural immunity due to prior infection with COVID-19, despite many known studies spanning decades and demonstrating that these individuals were more susceptible to serious injury from the injections; see: [https://www.thelancet.com/journals/langas/article/PIIS2468-1253\(21\)00008-X/fulltext](https://www.thelancet.com/journals/langas/article/PIIS2468-1253(21)00008-X/fulltext)

o) intentional disregard of the results of the animal challenge studies which resulted in up to 100% fatality rates, was egregious conduct under the norms of the medical communities' policies, procedures, ethical, licensing and other mandates which govern such conduct; see: <https://foreignaffairsintelligencecouncil.files.wordpress.com/2021/02/horrific-latent-deaths-predicted-among-the-elderly-by-genetics-professor-after-immunization-with-rna-vaccines.pdf>

p) Defendant Manufacturers knew or should have known their Emergency Use Authorization would result in mass fatalities of the Users; See: <https://www.lifesitenews.com/news/vaccine-researcher-admits-big-mistake-says-spike-protein-is-dangerous-toxin>

q) Defendants threatened medical doctors who prescribed widely available, safe and effective therapeutic medicines in furtherance of coercing the public to take the

COVID-19 injections; See: <https://www.reuters.com/article/us-health-coronavirus-usa-hydroxychloroq-idUSKBN23B340>

r) Defendants defrauded and coerced the public by knowingly failing to disclose scientific study results and facts as well as knowingly disseminating fraudulent information to the public; See: <http://amsterdamnews.com/news/2020/dec/24/why-black-people-cannot-trust-pfizer-vaccine/>

s) Defendants failed to provide notice of risks and the right of informed consent to the public (per Nuremberg Code); <https://pubmed.ncbi.nlm.nih.gov/33113270/>

t) sufficient evidence exists to support a determination that: 1) a bioweapon in the form of a spike protein created in Wuhan, China through GOF research was released into the civilian population; 2) for the purpose of or intent to cause a demand for COVID-19 injections; 3) irrespective of or with intent to diminish, disregard or subvert known and efficient, existing therapies; 4) with the intent to cause harm or without regard to the consequences of harm that was known or foreseeable to the users; 5) for purposes of injuring, harming, controlling or killing the users; 6) while Defendant stakeholders enjoy and/or enjoyed monetary or other economic, academic or political rewards. See: <https://thetruthaboutvaccines.com/stop-damage-mrna-vaccines/> & Supra.

**A world of tighter top-down government control and more authoritarian leadership, with limited innovation and growing citizen pushback**

In 2012, the pandemic that the world had been anticipating for years finally hit. Unlike 2009's H1N1, this new influenza strain —originating from wild geese —was extremely virulent and deadly. Even the most pandemic-prepared nations were quickly overwhelmed when the virus streaked around the world, infecting nearly 20 percent of the global population and killing 8 million in just seven months, the majority of them healthy young adults. The pandemic also had a deadly effect on economies: international mobility of both people and goods screeched to a halt, debilitating industries like tourism and breaking global supply chains. Even locally, normally bustling shops and office buildings sat empty for months, devoid of both employees and customers.

The pandemic blanketed the planet —though disproportionate numbers died in Africa, Southeast Asia, and Central America, where the virus spread like wildfire in the absence of official containment protocols. But even in developed countries, containment was a challenge. The United States's initial policy of "strongly discouraging" citizens from flying proved deadly in its leniency, accelerating the spread of the virus not just within the U.S. but across borders. However, a few countries did fare better —China in particular. The Chinese government's quick imposition and enforcement of mandatory quarantine for all citizens, as well as its instant and near-hermetic sealing off of all borders, saved millions of lives, stopping the spread of the virus far earlier than in other countries and enabling a swifter post-pandemic recovery.

## The Event 201 scenario

Event 201 simulates an outbreak of a novel zoonotic coronavirus transmitted from bats to pigs to people that eventually becomes efficiently transmissible from person to person, leading to a severe pandemic. The pathogen and the disease it causes are modeled largely on SARS, but it is more transmissible in the community setting by people with mild symptoms.

**System and Method for Testing for COVID-19**

**Abstract**

A method is provided for acquiring and transmitting biometric data (e.g., vital signs) of a user, where the data is analyzed to determine whether the user is suffering from a viral infection, such as **COVID-19**. The method includes using a pulse oximeter to acquire at least pulse and blood oxygen saturation percentage, which is transmitted wirelessly to a smartphone. To ensure that the data is accurate, an accelerometer within the smartphone is used to measure movement of the smartphone and/or the user. Once accurate data is acquired, it is uploaded to the cloud (or host), where the data is used (alone or together with other vital signs) to determine whether the user is suffering from (or likely to suffer from) a viral infection, such as **COVID-19**. Depending on the specific requirements, the data changes the data, and/or the determination can be used to alert medical staff and take corresponding actions.

**Description**

**BACKGROUND OF THE INVENTION**  
1. Field of the Invention  
[0001] The present invention relates to diagnosing an individual's health/wellness, and more specifically, to a system and method for using a mobile computing device (e.g., a smartphone) to acquire and provide vital signs, which can then be used to determine (or aid in the determination of) an individual's health/wellness, including whether an individual is suffering from a biological and/or viral infection (e.g., COVID-19, etc.) or other respiratory condition/s or symptoms. The present invention could be used in conjunction with a telemedicine or "digital health" system to provide a reliable and convenient method for remote collection and observation of a patient's vital signs.  
2. Description of Related Art  
[0002] Recently, devices have been developed that are capable of measuring, sensing, or estimating in a convenient form factor at least one or more metrics related to a physiological characteristic, commonly referred to as biometric data. For example, devices that resemble watches have been developed which are capable of measuring an individual's heart rate or pulse, and, using that data together with other information (e.g., the individual's age, weight, etc.), to calculate a resultant such as the total calories burned by the individual in a given day. Similar devices have been developed for measuring, sensing, or estimating other kinds of metrics, such as blood pressure, blood oxygenation levels, breathing patterns, breath composition, sleep patterns, and blood alcohol level, to name a few. These devices are generally referred to as biometric devices or biometric metrics devices.  
[0003] The types of biometric devices continue to grow, as do the ways in which both the core biometric data and the data that can additionally be derived or further extrapolated from that biometric data. For example, heart rate data is typically used to give an individual information on their pulse and calories burned, whereas HRV or heart rate variability is sometimes also increasingly being used as a determinant of an individual's stress levels. The data measured from oximeters (perfusion index, oxygen saturation level and pulse) can additionally be used to derive algorithmically the individual's respiratory rate or RRR. By way of another example, blood alcohol data is typically used to give an individual information on their blood alcohol level, and hence to inform the individual on whether or not they can safely or legally operate a motor vehicle.  
[0004] By way of other examples, an individual's breathing pattern (measurable for example either by loudness level in decibels, or by variations in decibel level over a time interval) or measurable changes over a short space of time in levels of oxygen saturation in their blood caused by a stopped or snore breathing event (SBE), or by the total number of SBEs occurring during sleep, may be monitored by a doctor, nurse, or medical technician to help determine whether the individual suffers from sleep apnea. Similarly, an individual's vital signs (e.g., pulse, breathing rate, oxygen saturation levels, etc.) may be monitored (e.g., by a doctor, etc.) to determine the individual's health and/or wellness in relation to certain medical conditions or symptoms. Such information can also be used to determine whether a person is suffering from a bacterial and/or viral infection, such as coronavirus, or COVID-19.  
[0005] With that being said, it would be beneficial if biometric data could be acquired and provided to a medical facility or the like without requiring human contact between the patient and the monitoring staff (i.e., remotely) for reasons including convenience, cost and diminished risk of infection or cross-infection. The biometric data would also be more informative or dynamic if it could be combined with other data (e.g., video data, etc.), provided (e.g., wirelessly, over a network, etc.) to a remote device, and/or readable (e.g., allowing certain conditions, such as an elevated heart rate or hypoxia, to be quickly identified) and/or

Hello Anthony,

This is how the virus was created.

Intervirion Fusion. HIV-luc(ACE2) (500 ng of p24) was mixed with 1,000 ng of p24 of HIV-gfp particles incorporating ASLV-A envelope, SARS-CoV S protein, or both envelopes in PBS at 4°C for 30 min to allow binding. Samples were raised to 37°C for 15 min to allow for conformational rearrangements. Virions were adjusted to the desired pH with 0.1 M citric acid. PBS, TPCK-trypsin (final concentration 10 µg/ml), CTSL, cathepsin B (CTSB) (final concentrations 2 µg/ml) or CTSL buffer alone was then added. Recombinant CTSL (R & D Systems) was preactivated by incubation for 15 min at 10 µg/ml in 50 mM Mes, pH 6.0, on ice. Recombinant CTSB (R & D Systems) was preactivated in 25 mM Mes, 5 mM DTT, pH 5.0, for 30 min at 25°C. After a 10-min incubation at 25°C, proteolysis was halted by the addition of 300 µl of DMEM10 containing leupeptin (25 µg/ml) and STI (75 µg/ml). Virions were then incubated at 37°C for 30 min to allow membrane fusion. 100 µl of the virion mixture was added in quadruplicate to HeLa-Tva cells pretreated for 1 h with leupeptin (20 µg/ml). The cells were spin-infected and incubated at 37°C for 5 h

## Hydroxychloroquine or chloroquine with or without a macrolide for treatment of COVID-19: a multinational registry analysis

Mandeep R Mehra, Sapan S Desai, Frank Ruschitzka, Amit N Patel

### Summary

**Background** Hydroxychloroquine or chloroquine, often in combination with a second-generation macrolide, are being widely used for treatment of COVID-19, despite no conclusive evidence of their benefit. Although generally safe when used for approved indications such as autoimmune disease or malaria, the safety and benefit of these treatment regimens are poorly evaluated in COVID-19.

**Methods** We did a multinational registry analysis of the use of hydroxychloroquine or chloroquine with or without a macrolide for treatment of COVID-19. The registry comprised data from 671 hospitals in six continents. We included patients hospitalised between Dec 20, 2019, and April 14, 2020, with a positive laboratory finding for SARS-CoV-2. Patients who received one of the treatments of interest within 48 h of diagnosis were included in one of four treatment groups (chloroquine alone, chloroquine with a macrolide, hydroxychloroquine alone, or hydroxychloroquine with a macrolide), and patients who received none of these treatments formed the control group. Patients for whom one of the treatments of interest was initiated more than 48 h after diagnosis or while they were on mechanical ventilation, as well as patients who received remdesivir, were excluded. The main outcomes of interest were in-hospital mortality and the occurrence of de-novo ventricular arrhythmias (as defined or confirmed ventricular tachycardia or ventricular fibrillation).

**Findings** 96 032 patients (mean age 53·8 years, 46·3% women) with COVID-19 were hospitalised during the study period and met the inclusion criteria. Of these, 18 688 patients were in the treatment groups (1868 received chloroquine, 3783 received chloroquine with a macrolide, 3016 received hydroxychloroquine, and 6221 received hydroxychloroquine with a macrolide) and 77 344 patients were in the control group. 10 698 (11·1%) patients died in hospital. After controlling for multiple confounding factors (age, sex, race or ethnicity, body-mass index, underlying cardiovascular disease and its risk factors, diabetes, underlying lung disease, smoking, immunosuppressed condition, and baseline disease severity), when compared with mortality in the control group (9·3%), hydroxychloroquine (18·0%; hazard ratio 1·335, 95% CI 1·228–1·457), hydroxychloroquine with a macrolide (23·8%; 1·447, 1·368–1·531), chloroquine (16·4%; 1·365, 1·218–1·531), chloroquine with a macrolide (22·2%; 1·368, 1·273–1·469) were each independently associated with an increased risk of in-hospital mortality. Compared with the control group (0·3%), hydroxychloroquine (6·6%; 2·368, 1·935–2·906), hydroxychloroquine with a macrolide (8·1%; 5·106, 4·106–5·983), chloroquine (4·3%; 1·551, 1·210–4·596), and chloroquine with a macrolide (6·5%; 4·011, 3·344–4·812) were independently associated with an increased risk of de-novo ventricular arrhythmia during hospitalisation.

**Interpretation** We were unable to confirm a benefit of hydroxychloroquine or chloroquine, when used alone or with a macrolide, on in-hospital outcomes for COVID-19. Each of these drug regimens was associated with decreased in-hospital mortality, but an increased frequency of ventricular arrhythmias when used for treatment of COVID-19.

### Introduction

The absence of an effective treatment against severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) infection has led clinicians to redirect drugs that are known to be effective for other medical conditions to the treatment of COVID-19. Key among these repurposed therapeutic agents are the antimalarial drug chloroquine and its analogue hydroxychloroquine, which is used for the treatment of autoimmune diseases, such as systemic lupus erythematosus and rheumatoid arthritis.<sup>1,2</sup> These

drugs have been shown in laboratory conditions to have antiviral properties as well as immunomodulatory effects.<sup>3,4</sup> However, the use of this class of drugs for COVID-19 is based on a small number of anecdotal experiences that have shown variable responses in uncontrolled observational analyses, and small, open-label, randomised trials that have largely been inconclusive.<sup>5,6</sup> The combination of hydroxychloroquine with a second-generation macrolide, such as azithromycin (or clarithromycin), has also been advocated,

## The novel coronavirus' spike protein plays additional key role in illness

**Salk researchers and collaborators show how the protein damages cells, confirming COVID-19 as a primarily vascular disease**

April 30, 2021

LA JOLLA—Scientists have known for a while that SARS-CoV-2's distinctive "spike" proteins help the virus infect its host by latching on to healthy cells. Now, a major new study shows that the virus spike proteins (which behave very differently than those safely encoded by vaccines) also play a key role in the disease itself.

The paper, published on April 30, 2021, in *Circulation Research* also shows conclusively that COVID-19 is a vascular disease, demonstrating exactly how the SARS-CoV-2 virus damages and attacks the vascular system on a cellular level. The findings help explain COVID-19's wide variety of seemingly unconnected complications, and could open the door for new research into more effective therapies.

"A lot of people think of it as a respiratory disease, but it's really a vascular disease," says Assistant Research Professor **Uri Manor**, who is co-senior author of the study. "That could explain why some people have strokes, and why some people have issues in other parts of the body. The commonality between them is that they all have vascular underpinnings."

Salk researchers collaborated with scientists at the University of California San Diego on the paper, including co-first author Jiao **Zhang** and co-senior author John Shyy, among others.

**Abstract**

**Background:** Severe acute respiratory syndrome (SARS) emerged in China in 2002 and spread to other countries before brought under control. Because of a concern for reemergence or a deliberate release of the SARS coronavirus, vaccine development was initiated. Evaluations of an inactivated whole virus vaccine in ferrets and nonhuman primates and a virus-like-particle vaccine in mice induced protection against infection but challenged animals exhibited an immunopathologic-type lung disease.

**Design:** Four candidate vaccines for humans with or without alum adjuvant were evaluated in a mouse model of SARS, a VLP vaccine, the vaccine given to ferrets and NHP, another whole virus vaccine and an rDNA-produced S protein. Balb/c or C57BL/6 mice were vaccinated i.m. on day 0 and 28 and sacrificed for serum antibody measurements or challenged with live virus on day 56. On day 58, challenged mice were sacrificed and lungs obtained for virus and histopathology.

**Results:** All vaccines induced serum neutralizing antibody with increasing dosages and/or alum significantly increasing responses. Significant reductions of SARS-CoV two days after challenge was seen for all vaccines and prior live SARS-CoV. All mice exhibited histopathologic changes in lungs two days after challenge including all animals vaccinated (Balb/c and C57BL/6) or given live virus, influenza vaccine, or PBS suggesting infection occurred in all. Histopathology seen in animals given one of the SARS-CoV vaccines was uniformly a Th2-type immunopathology with prominent eosinophil infiltration, confirmed with special eosinophil stains. The pathologic changes seen in all control groups lacked the eosinophil prominence.

**Conclusions:** These SARS-CoV vaccines all induced antibody and protection against infection with SARS-CoV. However, challenge of mice given any of the vaccines led to occurrence of Th2-type immunopathology suggesting hypersensitivity to SARS-CoV components was induced. Caution in proceeding to application of a SARS-CoV vaccine in humans is indicated.

VAERS is the primary government-funded system for reporting adverse vaccine reactions in the U.S. The CDC uses it for their data.

Friday's data show that between Dec. 14, 2020 and May 21, showed an increase of 205 deaths over the previous week — and 21,537 serious injuries, up 3,009 since last week.

Last week's data showed 3,449 total adverse events, compared with 943 reports last week, among 12- to 17-year-olds. Last week's data included 58 reports of serious adverse events in the 12- to 17-year-old age group.

In the U.S 281.6 million COVID vaccine doses had been administered as of May 21. This includes 120 million doses of Moderna's vaccine, 152 million doses of Pfizer and 10 million doses of the Johnson & Johnson (J&J) COVID vaccine.

Of the 4,406 deaths reported as of May 21, 23% occurred within 48 hours of vaccination, 16% occurred within 24 hours and 38% occurred in people who became ill within 48 hours of being
